

*Our passion is giving
what do you want.....*

SYLVI LIFE SCIENCES PVT. LTD.

Quality is not act. It is a habit.

CAA Approved

SYLVI LIFE SCIENCES PVT. LTD.

Quality is not act. It is a habit.

Plot No.: 174, Sy. No.: 62/1/A, Bahadurpally,
Hyderabad - 500 043. Telangana.
Customer Care No.: +91 9133 105 999
E-mail: sylvilifesciences@gmail.com
Web.: sylvilifesciences.com

About us:

*Sylvi life sciences is an aquatic retailer specialising in Minerals, Bio Pharmaceuticals, Enzymes, Probiotics, Feed supplements and Bio molecules
We supply healthy products and everything you need
to be successful in Aqua culture of shrimp/Fish .*

*Sylvi Life sciences was founded in 2018 (Start-up company) and
has gone from strength to strength ever since with a broad customer base .*

Quality is not act. It is a habit - that is our motto.

We know what is important to you and we strive to fulfil all your expectations

*Top quality products
Healthy and good quality for shrimp/Fish
Best customer service
Lots of advice and information*

Quality is not act. It is a habit.

CALCIUM CHLORIDE

CaCl₂ = 110.99
SPECIFICATION:
Minimum Assay 90% w/w
pH (10% Sal) 9.6%
Max. limits of Impurities
Iron (Fe) 0.01

MAGNESIUM CHLORIDE

SPECIFICATION:
Minimum Assay 98.0%w/w
pH 7.0
MgCl₂·6H₂O = 203.30
Laboratory Reagent

POTASSIUM CHLORIDE

CAS No. (7447-40-7)
Purity - 99% KCL
FW : 74.56
pH : 7
Pack : 5kg pack of 50kg

Quality is not act. It is a habit.

BIOPURE

Anaerobic & non-pathogenic soil native pro-biotics Aqua base carrier & stabilizers Q.S.

Benefits:

- Reduces pond bottom sludge
- Improves soil mineralization activity
- Helps to maintain clean pond water
- Reduces the pond pollution
- Controls the D.O. levels etc.

Dosage: 5-10 kg/acre, use as directly by an aqua consultant / technician

SYLBKC

Benzalkonium Chloride - 50% & 80% with suitable stabilizers and activators.

Benefits:

Syl-BKC is a specially formulated B.K.C, Syl-BKC is a stable form of Alkyl Benzyl Dimethyl Ammonium Chloride highly effective against Bacterial, Protozoal; Fungal and Viral diseases of fish, prawn & shrimps. It is powerful sanitizer which helps in including moulting and also prevents water contamination.

Dosage:

Dilute 500ml to 1000ml Syl-BKC in 100ltrs of water and spray uniformly throughout the culture of pond of one acre or Metre water depth.

SYLBRO

Brominated compound: 6W/V & Stabilizers.

Benefits:

- Effectively reduces the microbial load of the pond.
- If avoids stress, clean-up antenna rot, gill rot and tail rot in shrimp.
- Avoids the formation of fungus bed in the pond water and sludges in the bottom.
- Prevents over reproduction of green and blue green algae and sanitizes the water.

Dosage:

Prawn 1-2 liters per acre. Fish 0.5-1 liter per acre (or) as advised by Aqua Consultant.

Quality is not act. It is a habit.

SYLMIN GOLD PLUS

Sylmin Gold plus provides dissolvable form of essential minerals and ions such as magnesium, Calcium, Potassium, Phosphorus, Chloride and Sulphate into the pond water.

Benefits:

- ✓ It enrich levels of the minerals in the pond.
- ✓ Develops Prawn pigmentation.
- ✓ Enhances moulting process.
- ✓ Develops shell formation.
- ✓ Avoids cramping.
- ✓ Avoids loose and soft shell problems.
- ✓ Improves good pond water ecology.
- ✓ Increase FCR growth and survival.

Dosage:

Regular Usage: 5Kgs per acre of pond.
During moulting : 7Kgs per acre of pond.
At the time of pond preparation and phytoplankton bloom: 10Kgs per acre of pond.
Or as directed by aqua culture consultant.

SYLMIN

Sylmin provides dissolvable form of essential minerals and ions such as magnesium, Calcium, Potassium, Phosphorus, Chloride and Sulphate into the pond water.

Benefits:

- ✓ SYLMIN mineral imbalance in water & soil.
- ✓ SYLMIN improves growth.
- ✓ SYLMIN improves molting.
- ✓ SYLMIN maintains optimum pH.

Dosage:

5-8kgs/Acre for Prawn.
3-5kgs/Acre for fish.
Or as directed by aqua culture consultant.

ZEOSYL-G/P

Composition:

SiO₂, I₂O₃, Fe₂O₃, CaO, MgO, Na₂O
40-60% 12-24% 2-5% 10-20% 2-5% 1-2%

Benefits:

Molecular Pore Structure: Zeo Syl - G because of its unique molecular pore structure absorb toxic gases like Ammonia(NH₃), Hydrogen Sulphide (H₂S) and other liberated anions for pond water. Dual acting: Zeo Syl - G has dual capabilities of neutralization absorbed Ammonia(NH₃), by ion exchanging the free Ammonia caution. Reduce Waste: Zeo Syl -G Absorbs suspended solids, refuse & filthy material. Helps increases D.O.: Zeo Syl - G helps increase level of Dissolved Oxygen (D.O) in the pond water. Helps plankton growth: Zeo Syl - G aids in uninhabited growth of plankton. treated seed culture of non pathogenic soil inhabitant bacteria. Improves Water quality: Zeo Syl - G neutralization Amonia removes bad from the pond water and improves water quality

Dosage: Pond Preparation: Scatter evenly, 50kgs or more per acre of water spread area, upon bottom or as advised by your Aqua culture consultant.
During Culture: Broadcast evenly 25Kgs or more per acre upon the pond water once every 20 days or as advised by your Aqua culture consultant.

Quality is not act. It is a habit.

PROSURE-W

Prosure-W is the unique multi strain probiotic product line of specially designed for aquatic services. The Prosure-W product line consists of several carefully selected bacterial strains with superior probiotic and biodegradable features.

Benefits:

- Controls & stabilizes the pH and salinity conditions.
- Removes organic load of pond bottom and reduces the pollution of pond.
- Inhibits vibrio & other pathogenic bacteria and reduces bacterial toxins in the pond.
- Ensures healthy environment for the prawn, fish & shrimp by reducing BCD and increasing DO levels.
- Reduce pond bottom sludge.

Dosage: 1000gm/acre use as directed by aqua consultant/ technician.

FEED PLUS

- FEED PROBIOTIC
- IMMUNE BOOSTER
- GUT PROBIOTIC
- GROWTH PROMOTER

Benefits:

- Enhances healthy balance flora.
- Improve feed intake.
- Promotes growth.
- Detoxifies pond water.
- Enhances FCR.
- Reduces disease incidence.
- Reduces mortality rate.
- Enhances immunity.

Dosage: 10-20g/Kg of feed, use as directed by aqua consultant/ technician.

GAS CARE

- Bacillus subtilis
- lactobacillus acidophilus
- Bacillus Licheniformis
- lactobacillus casei
- Bacillus Megatenum
- Thio bacillus denitrificans

Benefits:

- Reduces toxic ammonia, HS .
- Reduces foul odors from pond.
- Reduces the organic sludge.
- Reduces nitrates in the water.
- Reduces frequent water change.
- Detoxify pond water.

Dosage: 1-1.5kg/acre use as directed by aqua consultant/ technician.

Quality is not act. It is a habit.

IODINE-2%

Composition:

Nonyl Alkyl Phenoxyethanol, Ethylene Oxide, Iodine Complex Providing 2% available Iodine.

Benefits:

For the affective control of Black Gill, Brown Spot, Red Spot, Gas Bubble, Finrol etc

Dosage:

Applications	Quantity
Prawn Tanks	250ml per acre
Fish Tanks	500ml per acre

Note:

Dilute one volume of Iodine-2% with 30-40 volumes of water and spray uniformly through the pond.

IODINE-20%

Nonyl Alkyl Phenoxyethanol, Ethylene Oxide, Iodine Complex Providing 20% available Iodine.

Benefits:

For the affective control of Black Gill, Brown Spot, Red Spot, Gas Bubble, Finrol etc

Dosage:

Applications	Quantity
Prawn Tanks	250ml per acre
Fish Tanks	500ml per acre

Note:

Dilute one volume of Iodine-20% with 20-30 volumes of water and spray uniformly through the pond.

SYL-SANITIZER

Syl Sanitizer is formulated with special sanitizing compounds. It induces moulting. It kills the pathogenic bacteria. It stables the pH, it controls incidence of bacterial viral and protozoal diseases.

Composition :

Glutaraldehyde 5%, B.K.C. 10%, Quaternary Ammonium Compounds 30%

Application :

Fill the baths with Syl Sanitizer solution, if required change the solution after 2 or 3 days or as directed by aqua consultant.

Note: Performance depends on the water quality

Quality is not act. It is a habit.

SYL YEAST

Syl Yeast is a powder blend of active yeast, enzymes, Probiotics and oligosaccharides (B-Glucans and manans), Specially designed for shrimp and fish rations for the purpose of improving feed efficiency, for healing in disease prevention and improving shrimp and fish quality.

Benefits:

- Reduction in mortality due to opportunistic pathogens.
- Prevention of viral diseases.
- Enhance disease resistance of farmed shrimp.
- Reduction of mortality in juvenile fish.
- Enhance the resistance to parasites.
- Increase efficiency in the use of feed ingredients.

Dosage: Prawn / Fish: 3kg per Ton of feed or advised by the aqua culture consultant

SYL-YUCCA

Composition: Yucca Schidigera

Benefits:

- Syl-Yucca reduces ammonia and controls noxious odor.
- Maintains healthy pond bottom & increases immuno response.
- It reduces B.O.D. and C.O.D. demand.
- It increases the D.O levels in water and also improve water quality.

Dosage:

500g per acre or as per advise of aqua consultant.

POTASSIUM PERMANGANATE

Composition:

Potassium Permanganate 99+% Free Iron Antibiotics

Benefits:

- Combats algae overgrowth.
- Clear cloudiness and doors in pond water.
- Useful to treat columnaris infections.

Dosage:

Consult our field staff or your pond specialist for specific usage and directions.

Quality is not act. It is a habit.

PRO-BIND

PRO-BIND is a nutritional, all natural, all purpose pellet binder. It is a combination of specific natural gums that ensures high performance without interference from any chemical substances. Further as it is 100% natural product. It does not pollute the pond bottom and does not affect the water quality. It is a lemon yellow liquid with slightly sweet taste. Highly cost effective and convenient to farmer.

Benefits:

- Has excellent water stability.
- Ensures uniform dispersion of feed.
- Prevents any wastage or leaching of active compounds does not Pollute the pond bottom and water.

Dosage:

30ml for kg of feed or as per requirement.

AQUA SOFT

Aqua soft is Ethylene diamine tetra acetic acid(EDTA) formulated salt compounds.

Benefits:

Reduce hardness level to minimum levels by stabilizing the alkalinity in the pond water completely prevents plankton crash.

Dosage:

1kg of Aqua sot in 50Ltrs of water and spray evenly in the pond .

SUPER-PS

Rhodococcus sp, Rhodobacter sp Concentrain @+109cfu per ml.

Benefits:

Reduces water pollutants in water, soil and also reduces H2S, Ch4 and other alcoholic gases. Improve the useful bacteria (Non-pathogenic Bacteria) so the Pathogenic bacteria will be reduced, Improve the D.O level in the pond. Removes the undigested, unused proteins, carbohydrates lipids and other harmful substances. Prevents the occurance of diseases. Maintains the alkalinity and pH and reduce the stress of shrimps.

Dosage:

Preparation of Pond : 7 to 10 litres per hectare
During Culture : Early stage 1 litre per hectare depend on pond condition. Middle stage 2 litres per hectare depend on pond condition. Final stage 2-4 litres per hectare depend on pond condition. For better results mix with zeolite before applying

Quality is not act. It is a habit.

TRACKSURE

Herbal maringa, Ginseng, Origanum vulgare, Garlic organic, acid products & Suitable carrier

Benefits:

- White gut control
- White feces control
- Disease control
- Vibrio control
- Enhances immunity power
- Reduces diseases
- Reduces mortality rate etc.

Dosage: 5-10gm/kg of feed for 5days as directed by an aqua consultant technician.

OXYSYL-G/P

Composition:

Sodium per carbonate 13% Release mineral fillers & stabilizer Q.S.

Benefits:

- Rapid enhancement of dissolved oxygen level is in the pond water.
- Detoxification noxious gases and substances such as nitrites & hydrogen sulphide.
- Increases survival and promotes health growth
- Supports mineralisation of pond.
- Reduces the frequency water exchange.

Dosage: 1-2 kg/acre, use as directly by an aqua consultant / technician

VIBSYL

Bacillus subtilis	streptococcus lactis	Bacillus amyloliquefaciens
Bacillus licheniformis	lactobacillus acidophilus	Pediococcus acidilactici
Bacillus polymyxa	lactobacillus casei	

Benefits:

- Anti abacterial
- Anti viral
- Anti fungal
- Reduces water home diseases
- Reduces pollution generated in the water

Dosage: 500gm-1000gm/acre use as directed by aqua consultant/ technician.

CALCIUM PERAXIDE

Oxygen Precursors, Pro-biotics and Detoxificants and Calcium Peroxide(CaO₂), Sodium derivatives.

Benefits:

Sylmin liberates effective Oxygen Volume of as much as 50,000ml/kg of CaO₂. Sylmin increases DO levels and prevents sludge formation at pond bottom. Sylmin kills harmful bacteria like Vibrio. Sylmin improves survivability and growth. Prevents formation of toxic gases like NH₃, So₂, CO and H₂S at the pond bottom.

Dosage:

Use 1kg/acre. Mix with Sand and Broadcast over the pond area. During cloudy weather use this regularly as per the suggestions of Aqua Culture Specialist.

GROPLUS

Each gram contains 500mg of the following Amino acids, Minerals, Probiotics, Enzymes Vitamins Carrier & Stabilizers Q.S.

Benefits:

- Growth promoter.
- Immune booster.
- Reduces the stress.
- Prevents loose smell
- Improves functional efficiency of hepatopancreas
- Reduce disease incidence
- Balances vitamin deficiency

Dosage: 10g/Kg of feed, use as directed by aqua consultant/ technician.

SYLVI -C PLUS

Each gram of Sylvi C Plus contains Ascorbic Acid (Coated Vitamin-C) : 500gm

Benefits:

Sylvi C Plus is specially produced for the use as stabilized and powerful form of Vitamin-C formulation for use in Agriculture. Sylvi C Plus is a proven source of superior, stable and bio -available Vitamin-C for Aqua culture use. Fish, Prawn and Shrimp are unable to bio-synthesize Vitamin-C. Vitamin-C (Ascorbic Acid) is an essential dietary ingredient for fish, prawn and shrimp for disease resistance, rapid growth, high survival and moulting. The requirement of Sylvi C plus is related to stress, growth rate and size of fish, prawn and shrimp as well as to other nutrients present in the diet.

Dosage:

Sylvi C Plus is a highly concentrated and stable form of Vitamin-C with consistent quality and has to be used at 5 to 10 grain per kg of feed regularly for getting good results. Or as advised by Aqua culture Consultant.
